

i3Q-BIX DIGITAL SIGNAGE PLAYER

Communicate with impact

A picture is worth a thousand words. Dynamic messages combining both images and words will be remembered up to 7 times better than text-only messages! i3Q-Bix digital signage provides a targeted, fast communication solution with impact. Use the graphic i3Q-Bix designer software to inform your target group by easily displaying visually appealing messages on a widescreen LCD screen. The network connection allows you to make changes to your presentation from a remote location. Welcome to the communication platform of the 21st century!

User friendly

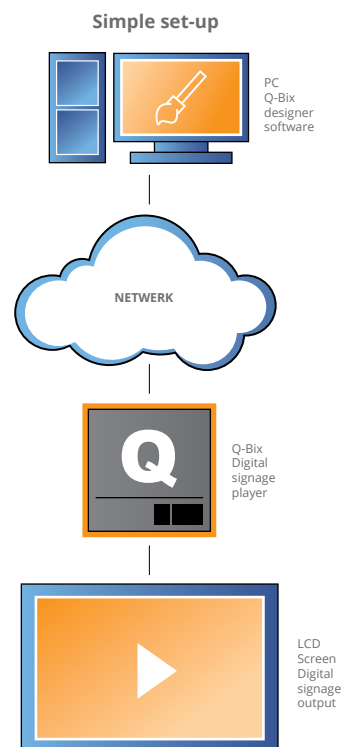

If you are familiar with the standard Microsoft® PowerPoint® application, our i3Q-Bix designer software will be perfect for you. This specially designed software includes no superfluous menus or options but instead offers adequate functionalities to meet all your requirements. This low-threshold designer tool is guaranteed to be user-friendly! The Designer software also contains several tools to make it easy. For example the preview option, the planning tool etc... The accessible nature guarantees that you will effectively use the software.

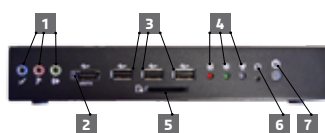

Budget friendly

You can download the i3Q-Bix Designer software at all times and for free from our website! there are no additional fees to pay. furthermore, the player works without a server, so again some additional costs you can delete from your budget.

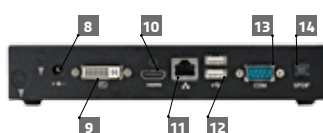

Get started now

Want to achieve immediate results? No experience with PowerPoint®? Use the i3Q-Bix designer software to create a stunning layout in a couple of minutes based on the templates included. Simply adjust the settings to your liking, insert the content, and the presentation is ready to be launched! The software includes templates for educational, government, healthcare and business applications.

Sound	3 x 3.5 phone jack (supports 5.1 channel audio)

Most important functions in the Designer software

Excel Integration:

Import a ready-to-use excel file in the Designer software and send it to the player. Not only the data but also formatting / alignment will be transmitted one-to-one to your i3Q-Bix presentation. When you make a change in your source file, the presentation will automatically update when synchronising.

Textbox:

Add a textbox to your Q-BiX presentation. The textbox allows you to add an unlimited amount of text, in any system font and format.

Textbanner:

Animate your overall presentation with special effects. Thanks to the Textbanner you can make f.ex. short messages scroll all over your screen.

Clock:

Integrate a digital or analogue clock feature in your presentation. Choose from different styles and set up the correct timezone.

Video:

Use multimedia tools in your presentation to add more appeal. Our Q-Bix player supports all popular video formats.

Images:

Insert images or a logo in your presentation, creating different effects.

Webpage:

Integrate web pages in your presentation. Each web page is updated automatically. Perfect for weather forecast displays, etc. Our Q-Bix Player supports Flash animation.

Playlist:

Use the Playlist option to play an entire photo album with the press of a button.
